Skilled in SQL, Python, Excel, and Power BI, with hands-on experience maintaining 200+ records, building KPI dashboards, analyzing business data, and automating recurring reporting.

CORE SKILLS

Analytics & Reporting: SQL, Excel, Power BI, Python, KPI Reporting, Data Visualization, Trend Analysis
Operations: Operational Reporting, Process Improvement, Data Quality, Documentation, Budget Tracking, Workflow Coordination
Data & Systems: SQL Server, MySQL, Relational Databases, Pandas, NumPy, Microsoft 365, APIs
Business Tools: Microsoft Office, Jira, Microsoft Project, Git, GitHub

EXPERIENCE

Information Technology Support Specialist (Internship) **Apr 2026 – Present**
Grace Helping Hands — Maryland, USA (Remote)

- Maintain a centralized Excel database of 200+ volunteer records, tracking assignments and active/inactive status to support accurate operational reporting.
- Review records for inactive or inconsistent entries and support ongoing data-quality maintenance and administrative workflows.
- Create and manage Microsoft 365 user accounts and access as part of volunteer onboarding and account lifecycle administration.

Volunteer Administrative Assistant **May 2026 – Present**
Tabula Rasa Domestic Violence, Inc. — Maryland, USA (Hybrid)

- Maintain budget-tracking spreadsheets, operational documentation, and administrative records to support day-to-day nonprofit operations.
- Coordinate scheduling, communications, and information across organizational activities while keeping records organized and current.
- Review workflows, handbooks, and documentation for accuracy and consistency and support improvements to administrative processes.

Data Analyst Intern **Jun 2021 – Aug 2021**
AgNext Technologies — Remote, Punjab, India

- Analyzed business datasets using SQL, Python, and Excel to identify trends and support operational decision-making.
- Built Power BI dashboards to track KPIs and communicate operational performance to stakeholders.
- Automated recurring reporting workflows using Python, reducing manual reporting effort by approximately 30%.

PROJECTS

Customer Churn Analysis | Python · Excel · Power BI

- Analyzed 7,043 telecommunications customer records to identify patterns and factors associated with churn and communicate findings through visual analysis.

MediSync | SQL · Python · APIs · Power BI

- Designed a simulated hospital data-integration project connecting patient, appointment, billing, and pharmacy information and developed a Power BI view for operational analysis.

Hospital Operations Analytics | **SQL · Excel · Power BI**

- Developing an independent hospital operations analytics project to clean and analyze structured healthcare data and build a Power BI dashboard for operational KPI reporting.
